The MS in Health Sciences is a 12-month terminal degree program that does not require a thesis. The program is designed to enhance competitiveness for entry into professional or graduate programs including an MD, DDS, DPH, MPH or PhD. The program also provides an excellent preparation for combining scientific knowledge with non-scientific degrees such as a JD or MBA.

Unique aspects of this program are:
- Inclusion of courses in both the biomedical and public health sciences to prepare students for a future that relies on the ability to apply basic science knowledge to the human population
- Gain skills in critical thinking via the attendance of seminars and by reading and critiquing the scientific and professional literature
- Complete an independent study project that will allow participants to gain specialized research knowledge in an area of their choosing
- Community service and leadership opportunities

FEATURES OF OUR PROGRAM
- 12-month duration
- 30 hours of graduate level coursework on topics complementary to coursework for advanced degree programs
- Customize electives to area of interest
- Cost-sharing for MCAT and DAT test preparation courses
- Training in study skills, interviewing, resume preparation and writing cover letters and personal statements
- MCAT, DAT, and GRE tests are not required for admission
- Summer or fall start time option
- Small class size
