Undergraduate Research Positions
Available in Cell Mechanics

Interested in conducting undergraduate research in the interdisciplinary field of Cell Mechanics? Contact us!

We are interested in studying the role of mechanical forces on cell functionality:

- **Mechano-transduction of Cancer Metastasis**
- **Dynamics of Cardiac Cells Synchronization**
- **Intracellular Signaling and Confocal Microscopy Imaging**

![Disassociated cells and Cell island](image1)

**Who:** All undergraduates are eligible to apply. Knowledge of biology, chemistry, mathematics, and physics is an advantage. *(10/hr)*

**When:** Deadline is July 25, 2012 (Position will be filled up soon!)

**Where:** MechSE Department

**Other:** Please email your resume to **Xin Tang** (xtang11@gmail.com) with the subject: “Undergrad Research Position”.
