MCB 401: Cellular Physiology, Fall 2021
3 undergraduate/graduate credit hours
Course Website on Moodle: https://learn.illinois.edu/course/view.php?id=60513

Instructor:
Dr. Catherine Christian-Hinman
email cathchri@illinois.edu; phone 217-244-8230
Office: 523 Medical Sciences Building

TA: Catie Cutia ccutia2@illinois.edu

Class hours and location: MWF 1:00-1:50 PM, Burrill Hall 124
Office hours (Held on Zoom, link posted in Moodle): Friday 9:30 – 10:30 AM

Please come and speak with us during office hours if you have a question or concern about the class. If the designated office hour times do not work in your schedule, please email to schedule an alternative appointment time, either on Zoom or in person, depending on your preference.

Course Overview and Description:
The main objective of this course is to provide you with a substantial introduction to the basic principles of cellular physiology. The content will focus on the cellular and molecular bases of physiological processes including cellular homeostasis, signal transduction, water transport, membrane potentials, cellular excitability, synaptic transmission and plasticity, and neuromuscular function. These effects at the cellular level provide the basis for organs to have the requisite machinery to function properly. Therefore, these biological processes are critical to both normal and pathological function, are targets for drug development and therapeutics for a wide variety of diseases, and are the fundamental bases of physiological parameters measured in a wide variety of clinical and biological research assessments in cells and animals. This course is thus appropriate for students interested in pursuing medical, veterinary, dental, or nursing school, or biological or biomedical research.

Prerequisite: MCB 252 (Cells Tissues & Development) or permission of instructor. This course is appropriate for senior undergraduate and graduate students.

Student Learning Outcomes:
After you complete this course, you will be able to:
- Describe how animal cell membranes are structured and how solutes and water are moved across in and out of cells
- Differentiate between different types of ion channels and other membrane proteins that permit movement of ions across cell membranes, and predict the direction of ion flux through these proteins
- Define the changes in membrane voltage associated with action potentials in multiple cell types and distinguish between the ionic basis of different types of action potentials
- Diagram the steps in synaptic vesicle release and reception of synaptic signals in target cells
- Compare the roles of neurons and glial cells in brain function and distinguish between different forms of cellular plasticity
- Evaluate works in the scientific research literature

Main Textbook:
Note: An online version of this book is freely available through the UIUC library at https://ebookcentral.proquest.com/lib/uiuc/detail.action?docID=5553767. You are not required to purchase this book to take this class.
Supplemental reading materials will be provided on the lab Moodle site as needed.
Powerpoint slides (both .pptx and .pdf versions) will be available on the Moodle site before each class.

**Journal Club:**
Selected papers from the literature will form the basis for our Journal Club. These papers and associated questionnaires will be provided on the course Moodle site at least 2 weeks before the designated class. For each session, you are expected to come to class having read the assigned paper and completed the written questionnaire.

You are encouraged to consult with each other to discuss the papers as part of your preparation of the assignment. However, **you must compose your answers to the questionnaire independently**; any written work that indicates copying or plagiarism will be treated as an academic violation. **All written assignments must be uploaded to Moodle prior to the beginning of class on the day of discussion. Each questionnaire will be worth 10 points. No credit will be given for questionnaires that are not submitted by the start of the designated class.**

On the days in the schedule designated for Journal Club, we will have a general class discussion of the papers. Through the discussion, you will be provided with the information needed to complete an assignment in Moodle. This assignment can be completed and submitted in class if you bring a computer but must be submitted by the start of the following class session for full credit. Completion of the Moodle assignment will be worth a total of 5 points.

**Policies:**

**Academic Integrity:** All students are expected to adhere to the Student Code guidelines on Academic Integrity, found at [http://studentcode.illinois.edu/article1_part4_1-401.html](http://studentcode.illinois.edu/article1_part4_1-401.html). Cheating and plagiarism of any form will not be tolerated. Examples of infractions, and the procedures for addressing suspected violations, may be found at [http://www.las.illinois.edu/students/integrity/](http://www.las.illinois.edu/students/integrity/).

**Social media and sharing of course information:** All publicly available information about this course is shared at the sole discretion of the instructors. Use of any social or electronic media to share information about the course is prohibited. Any social media or website that refers to this course must grant access to course personnel upon request. Failure to provide access will result in a failing grade in the course for the group/site’s administrator(s). Posting or redistributing of course material, including but not limited to Powerpoint slides, quizzes, and exams, in any format is strictly prohibited. Any use of this type may earn you a zero on the exam or a more extreme penalty at the discretion of the instructor.

**Phones and Laptops/Tablets:** Turn off all cell phones before class begins. If your phone rings, you must silence it immediately without answering. If this happens more than once, you may be asked to leave class for the day.

You may use a laptop or tablet for taking notes with all sounds muted. Any use of computers or devices that is disruptive to the learning of your fellow students will not be tolerated and may be grounds for removal from the class. **Quizzes will be taken in Moodle in class;** therefore, you may bring a laptop, tablet, or phone to use only to log in to Moodle and take the quiz. Calculators are not allowed during quizzes. You may also use a laptop, tablet, or phone to log in to Moodle to complete the in-class Journal Club assignments. **Note that use of laptops, tablets, calculators, phones, smart watches, or other electronic devices during exams is strictly prohibited.**

**Lecture recordings:** Lectures will be recorded and posted on Moodle for review. Therefore, it should not be necessary for students to make their own recordings, but students may choose to do so,
provided that ONLY audio recordings are made. Note that all material recorded is the intellectual and copyrighted property of the University of Illinois Board of Trustees and may be made for personal use only. Video recordings of any kind are strictly prohibited. Posting of audio recordings or transcriptions on social or electronic media platforms is strictly prohibited. Any student who violates these policies will receive a failing grade for the course.

Any behaviors disruptive to the class that are not addressed upon request from the instructors will not be tolerated, and you may be asked to leave class for the day.

Face coverings: All students, faculty, staff, and visitors are required to wear face coverings in classrooms and university spaces. This is in accordance with CDC guidance and University policy and expected in this class. Please refer to the University of Illinois Urbana-Champaign's COVID-19 website for further information on face coverings. Thank you for respecting all of our well-being so we can learn and interact together productively.

Building access: In order to implement COVID-19-related guidelines and policies affecting university operations, instructional faculty members may ask students in the classroom to show their Building Access Status in the Safer Illinois app or the Boarding Pass. Staff members may ask students in university offices to show their Building Access Status in the Safer Illinois app or the Boarding Pass. If the Building Access Status says “Granted,” that means the individual is compliant with the university’s COVID-19 policies—either with a university-approved COVID-19 vaccine or with the on-campus COVID-19 testing program for unvaccinated students.

Students are required to show only the Building Access Screen, which shows compliance without specifying whether it was through COVID-19 vaccination or regular on-campus testing. To protect personal health information, this screen does not say if a person is vaccinated or not. Students are not required to show anyone the screen that displays their vaccination status. No university official, including faculty members, may ask students why they are not vaccinated or any other questions seeking personal health information.

Class cancellation: If a class time is canceled due to an unforeseen circumstance (e.g., campus closure, severe illness of instructor), we will attempt to avoid changes to the schedule as much as possible by either posting a recorded lecture online as soon as possible after the canceled class or moving the class session onto Zoom in lieu of meeting in person. If absolutely necessary, an exam review session may be replaced with a regular class session but this will be considered a last resort.

Exams and Grading:
There will be 4 exams, 4 quizzes, and 4 Journal Clubs. All exams and quizzes will be taken during regular class hours (except for Exam 4, which will be taken during the Final Exam period). Each exam will have 25 questions. Quizzes will be taken in the first 15 min of the designated class session, and consist of 10 multiple choice, true-false, or fill-in-the-blank questions. Your scores will be available for review on the MCB 401 Gradebook within the course Moodle website.

</tr>
</tbody>
</table>

Minimum points for each letter grade: A+ = 196; A = 184; A- = 180; B+ = 176; B = 164; B- = 160; C+ = 156; C = 144; C- = 140; D+ = 136; D = 124; D- = 120; F < 120
Full completion and submission of homework assignments by the designated deadlines, as well as a fifth journal club assignment due by the start of the final exam, are optional but will be incorporated into grade calculations as up to 10 points of extra credit. More details on these assignments will be given later.

Based on the performance of the class as a whole, the grade scale may be adjusted to lower the cutoff for each grade at the sole discretion of the instructors. No requests for changes to final grades will be granted, and extraneous requests for extra credit opportunities beyond those already offered will not be entertained.

iClicker questions will be used during lectures. Participation in iClicker questions is optional and these questions do not enter into grade calculations, but you will likely find that participating helps you to see how well you are learning and integrating key concepts as the course progresses, which can aid in preparation for quizzes and exams. Please register your iClicker in Moodle by the end of the first week of class if you intend to participate.

**Attendance Policy:**
Credit is not given in this class for attendance only. Therefore, if you miss a regular class day (i.e., not an exam or quiz day) please do not submit an excused absence request.

**Missed Exams/Quizzes and Scheduling Conflicts:**
Make-up exams or quizzes will be scheduled only for students who have a documented excuse or written evidence of the conflict. Note that a scheduling conflict consists of an expected inability to be present in class at the scheduled exam/quiz time due to justified travel and/or a required academic or professional activity that is scheduled at the same time. Absences that may be excused include circumstances beyond the student’s control such as medical treatment, surgery related to prolonged illness or injury, pregnancy, legal matters, citizenship or naturalization processes, or acts of nature which cause destruction to a primary residence or disrupt air travel. Absences that may also be excused include a conference or job, and graduate or professional school interviews, though a best effort should be made to schedule these events to minimize class attendance disruption. All instances will require documentation.

Alternative times will not be arranged just because you have exams in other classes on the same day. Absences will also not be excused for family events such as reunions or weddings, or presence during serious illness of extended family members (aunt, uncle, niece, nephew, or cousin).

As soon as you are aware of an unavoidable scheduling conflict with an exam or quiz time, you must fill out an **online MCB 401 exam conflict request form** (available on the course Moodle website) and email Dr. Christian-Hinman and the TA. Planned absences must be communicated to the instructors at least 2 weeks in advance; note that as time gets closer to the exam/quiz day, it may become impossible to arrange for an alternative exam/quiz time. If an alternative time cannot be arranged, you must submit an MCB 401 absence report form (see below) which may or may not be accepted as a justified excuse.

In the case of illness or other severe unforeseen circumstance on an exam or quiz day, you must complete an online **MCB 401 absence report form** (available on Moodle) within 24 hours of the absence. You will then have 48 hours from the absence in which to submit documentation to Dr. Christian-Hinman. If you find yourself ill, you must submit confirmation of a visit with a medical practitioner within 24 hours of your absence. The confirmation cannot be provided by a relative, even if the relative is a practitioner. Course personnel will evaluate the documentation and decide whether or not there will be an option to compensate for the missed exam through either a make-up exam or proration. Failure to follow this procedure will result in a zero for the exam.
The Office of the Dean of Students will only provide informative letters to instructors for protracted illness of 3 or more days, certain emergencies and to be present during the serious illness of immediate family members (parents, legal guardian, spouse/partner, siblings, children, or grandparents). These letters do not excuse you from class but merely provide information for the instructor to consider with regard to excusing the absence and permitting make-up work. Students must request absence letters from the Office of the Dean of Students after the student has returned to class but not more than 10 business days after the last date of absence.

**Final Exam Conflict:**
Conflict final exams may only be granted for any one of the following situations:

- Students with three final exams scheduled within a 24 hour period as defined in Section 82.A.4). Final Examinations of the Code of Policies and Regulations Applying to All Students which can be found at: www.illinois.edu/admin/manual/code/
- Students who have two final exams scheduled at the same time. Final conflict exam requests should be made to the course with larger enrollment. Course personnel can assist with information to determine which course this would be.
- Students who have a verified personal problem, and who have received written permission to take a conflict final exam from a dean in their college.
- Students who have DRES academic accommodations.

Students that find themselves in any of the above situations should complete the online Conflict Final Exam Request Form which can be found on the course website. This request must be made by 5:00 pm on the last day of class in order for the request to be granted. Any requests made after this time may not be granted. If a conflict final exam is granted, it may be scheduled at any time during the final examination period at the discretion of the course instructors.

**Disability Access Statement:**
We are committed to providing a learning environment where all students can succeed. If you require special accommodations, please contact Dr. Christian-Hinman and the Disability Resources and Educational Services (DRES) as soon as possible. To contact DRES, you may visit 1207 S. Oak St., Champaign, call 217-333-4603, or email disability@illinois.edu. We will try to meet all accommodations once the process has started. Please note accommodations begin the day you contact Dr. Christian-Hinman with a current letter of accommodation from DRES and are not retroactive to the beginning of the semester.

**Adding the Course after the Semester Starts:**
We understand that the University has an add deadline 10 days into the semester, but the University lets individual courses and/or programs determine their policies for late adds. We feel that students who choose to add a course late do so at their own discretion with knowledge that there may be points lost in the process.

**Religious Observances and Practices:**
If you anticipate a potential conflict with a religious observance or practice, you should examine the calendar below for potential conflicts as soon as possible. If an accommodation is needed, you must complete the Request for Accommodation for Religious Observances at https://cm.maxient.com/reportingform.php?UnivofIllinois&layout_id=19 and notify Dr. Christian-Hinman by the end of the second week of the course. Requests that are not submitted within this time frame may not be granted. Information about accommodations can be found in the Student Code: http://studentcode.illinois.edu/.
